

Usage Guide

1. Make sure that PHP language can be compiled on your computer. A suggested tool is MAMP (found here: <https://www.mamp.info/en/downloads/>)

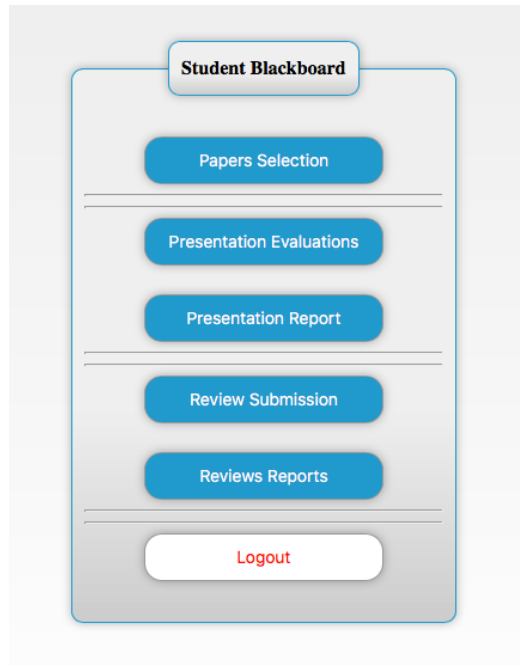

2. Unzip the source code file and move all files into your root folder.
3. By your internet browser, open the file “index.php”.
(your should then be re-directed to : <http://localhost:8888/public/control.php>)

The image shows a login form interface. At the top, there is a blue button labeled "Login". Below it, there are two input fields. The first is labeled "Student ID:" and contains the placeholder text "Please enter your student ID". The second is labeled "Password:" and contains the placeholder text "Please enter your password". At the bottom of the form, there is a blue button labeled "Login".

4. For the student blackboard, you may use this log-in information:
Student ID: 100
Password: 00

5. From the student blackboard, you may select a task (agent):

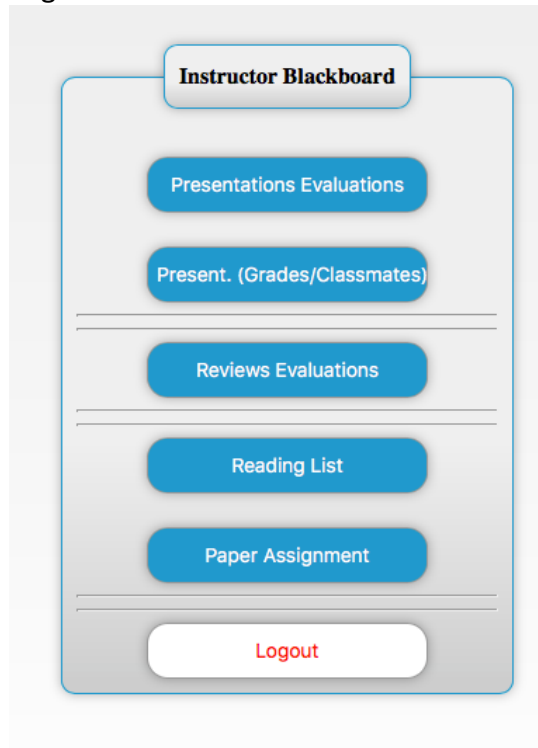

6. For the instructor blackboard, use this information to log-in

Instructor ID: admin

Password: admin

7. Then, you may select an agent from the instructor blackboard:

ALL agents are self-explanatory
